## **TST's AUSTRALASIAN OPERATIONS BOOST CAPACITY THROUGH NEW RESOURCES AND MARKET EXPANSION**

**SYDNEY** - TST's Australian operation proudly announces expansion of its customer service and technical resource base in order to meet demands throughout Australasia. The newest resources have considerable experience in business, technology and testing, all specific to the gaming industry.

CTO **Noah Turner** stressed... *"TST was fortunate to adopt high calibre testing staff who formerly worked at well known Australian gaming manufacturers and a respected Australian testing lab. While others in the industry are downsizing, TST ramped up on high calibre resources which resulted in almost zero learning curve"*.

Immediate results and long-term forecasts show that these resources will be valued assets as demand for TST's services continues to increase. The company has especially experienced a high demand for services leading up to the Australasian Gaming Expo (AGE), approaching later this month in Sydney ([www.austgamingexpo.com](http://www.austgamingexpo.com)).

TST Australia's Laboratory Manager, **Ash Mandanipour** notes... *"TST is performing exceptionally well and would like to thank our existing clients for their continued support to achieve this. Our recent operational improvements and continued expansion in the Australasian region have reassured us of our position in the industry. We're enthused about meeting at the upcoming AGE"*.

TST's staff looks forward to meeting all current, inquiring and potential clients at the AGE and encourage contact via the email addresses above to arrange a meeting.

**MANILA** - Due to market demands in Asia's more burgeoning markets, such as the Philippines, Singapore and Macau, TST proudly announces it has established a local presence in the Philippines to complement its existing Macau operations.

CEO **Salim Adatia** stated... *"TST continues to see considerable opportunity throughout Australia and New Zealand. We envisage further market growth in the Asian region as jurisdictions seek to implement Technical Standards more in line with established first tier jurisdictions. We're therefore expanding both our domestic Australian presence and our international Asian presence to better meet both local and international demands."*

\*\*\*\*\*

Since its inception in 1993, TST has offered gaming Regulators, Operators and Manufacturers a full range of independent regulatory compliance testing and consultation services to both the land-based and interactive gaming industry. In addition to this, TST's experts continue to provide Information Systems Security (ISS) audit and consultancy services relating to both logical and physical security of gaming systems and the environments within which they operate.
